

## Results orange carrots

### Growing season 2017

A field in the Netherlands planted with regular carrots was treated four times with the GOOD FOR GREENS® plant growth regulator. After harvest, a random sample of each treated and control carrots was sorted and weighed. The results are graphically shown below.

Graph 1 shows that the GOOD FOR GREENS® plant growth regulator produces larger carrots.

The total weight of the control sample is 14.450 g. An equal number of treated carrots weighs 16.277 g, hence the GOOD FOR GREENS® plant growth regulator provides 2.327 g more weight [13%]. Harvesting a full row of treated and control carrots showed a yield difference of 15%. The difference for A carrots is even 20%.

**Conclusion:** The GOOD FOR GREENS® plant growth regulator increases the yield of purple carrots by 15%.
