

Results purple carrots

Growing season 2016

A field in the Netherlands planted with purple carrots was treated four times with the GOOD FOR GREENS® plant growth regulator. After harvest, a random sample of each treated and control carrots was sorted and weighed. The results are graphically shown below.

Graph 1 shows that the GOOD FOR GREENS® plant growth regulator produces larger carrots.

The total weight of the control sample is 12.374 g. An equal number of treated carrots weighs 14.616 g, hence the GOOD FOR GREENS® plant growth regulator provides 2.242 g more weight [18%]. Harvesting a full row of treated and control carrots showed a yield difference of 17%.

Conclusion: The GOOD FOR GREENS® plant growth regulator increases the yield of purple carrots by 17 - 18%.
