

Results Boskoop apples Growing season 2017

An apple orchard in the Netherlands planted with the variety Boskoop was treated four times with the GOOD FOR GREENS® plant growth regulator. After harvest and cold storage of the apples, a full box of each treated and control was automatically sorted and weighed. The results are graphically shown below.

Graph 1 shows that the GOOD FOR GREENS® plant growth regulator results in larger apples.

The total weight of the control sample is 328 kg. An equal number of treated apples weighs 350 kg, hence the GOOD FOR GREENS® plant growth regulator provides 22 kg more fruit weight [7%].

Conclusion: The GOOD FOR GREENS® plant growth regulator increases the yield of Boskoop apples by 7%.
