

Results Crocus

Growing season 2017

A Pythium infested field in the Netherlands planted with King of the Stripe crocus bulbs was treated three times with the GOOD FOR GREENS® plant growth regulator. After lifting, a random sample of each treated and control bulbs was collected, sorted and weighed. The results are graphically shown below.

Graph 1.1 shows that the GOOD FOR GREENS® plant growth regulator produces larger bulbs.

Total weight of the treated sample is 4.656 g for 908 objects. The control sample has 4.122 g for the same number of bulbs, meaning an overall increase of 534 g or 13%. The treated tubers had higher dry matter and higher starch content.

Conclusion: The GOOD FOR GREENS® plant growth regulator increases crocus bulb weight by 13% and increases bulb size and starch and dry matter content.
