

Results anemones

Growing season 2017

A field in the Netherlands planted with Anemone blanda was treated three times with the GOOD FOR GREENS® plant growth regulator. After lifting, a random sample of each treated and control bulbs was sorted and weighed. The results are graphically shown below.

Graph 1 shows that the GOOD FOR GREENS® plant growth regulator produces larger bulbs.

The total weight of the control sample is 2.595 g. A comparable number of treated bulbs weighs 2.798 g, hence the GOOD FOR GREENS® plant growth regulator provides 203 g more weight [7%].

Conclusion: The GOOD FOR GREENS® plant growth regulator increases the yield of Anemone blanda bulbs by 7%.
